

Attention First, page 72, prompts 32–33

32. List 3-5 practical tools, templates, or supports in your system. What does each one help in the learner build, decide, or navigate.

My team member in my daily system is my Keep Notes app, my pen and paper, my Wick app, and my devices such as laptop and smartphone. I use my pen and paper to write my ideas in a blank page, and delegate the task in there. Then I put it in my Keep Notes to put in my tasks, and I delegate them there. My keep notes app itself has a system on it's own. There's the Inbox, Task List, and Dashboard of important things I need to be mindful off. To the inbox goes the idea that pops up in my brain that I don't wanna forgot. The task list, well as the name suggests, is where my tasks goes from my written ideas. My Wick app is connected to my canvas calendar where I can see my school works that I need to finish. There I can also delegate my homeworks, and assign them to my calendar. Lastly, my devices such as my laptop and mobile phone, they are the ones I use to finish my tasks.

These team members that I got greatly helped me to be productive. They help me remember the things that I need to do, to store the ideas I got and execute it later. Through this simple yet effective system, I've grown more as a person, execute the tasks that are important, and become more productive.

33. Write 3 identity-building questions that help learners discover what they bring to the work.

What are the tools that are available for me to use, and how can I utilize them properly to be my team member instead of just using it as a mere tool? What are my strengths and weaknesses? Through my strengths and weaknesses, am I a Master who prioritize details, or a Chief who prioritize coherence?
